MICROCREDENTIALS

Healthcare Administration

The Healthcare Administration microcredential recognizes the completion of a three-course sequence covering healthcare policy, healthcare financing, and healthcare administration. With the projected growth of more than 20% in healthcare administration jobs between 2016-2026, there is considerable demand for professionals with knowledge of the healthcare field. The healthcare administration microcredential exists within the MBA program as a selection of electives that allow students to add a specialized expertise without investing in a second master's degree. Although situated within the MBA program, non-matriculated students are eligible to earn this microcredential as well.

Music Business

The Music Business microcredential recognizes the completion of a four-course sequence covering artist management, entrepreneurship in music/art, arts and entertainment law, and financial statement analysis. Arts and culture are a source of growth in the Hudson Valley, and post pandemic, we expect a resurgence of the industry. There is demand for professionals with practical knowledge of how to structure and establish a business in the arts, specifically in music, as well as the management of artists and the related legal issues. The music business microcredential exists within the MBA program as a selection of electives that allow students to add a specialized expertise without investing in a second master's degree. Although situated within the MBA program, non-matriculated students are eligible to earn this microcredential as well.

Science of Reading Fundamentals

The Science of Reading Fundamentals microcredential introduces research-backed building blocks of literacy education. The fully online, self-paced curriculum has been created by our exceptional School of Education faculty and includes units on Phonology, Alphabetic Principle, Orthography, Fluency, Vocabulary, Narrative Comprehension and Expository Comprehension. Participants will have the option to join real-time webinars to engage with instructors and hear from additional experts as they move through the microcredential. It can be completed in as little as seven weeks or at a more gradual pace to fit your schedule. New York State teachers will receive 35 Continuing Teacher and Leader Education (CTLE) hours upon completion. The Science of Reading Fundamentals is content agnostic and is designed to be a valuable complement to any P-12 literacy program.
