ELECTRICAL AND COMPUTER ENGINEERING

(845) 257-3720

The Division of Engineering Programs offers the following programs (all accredited by the Engineering Accreditation Commission of ABET, http://abet.org):

Bachelor's + Master's Degree Programs in 5 Years

B.S. in Computer Engineering + M.S. in Electrical Engineering (266)
This program offers a fast-track Master of Science degree in electrical engineering. The program is open to SUNY New Paltz students who are currently enrolled in their last semester of the junior standing, pursuing a Bachelor of Science in computer engineering

B.S. in Electrical Engineering + M.S. in Electrical Engineering (267)
This program offers a fast-track Master of Science degree in electrical engineering. The program is open to SUNY New Paltz students who are currently enrolled in their last semester of the junior standing, pursuing a Bachelor of Science in electrical engineering

Master of Science in Electrical Engineering (265)

Graduate Coordinator: Dr. Damodaran Radhakrishnan
845-257-3772 or damu@newpaltz.edu

The Master of Science in Electrical Engineering provides a quality graduate program offered within a small setting, where students get individual attention. The program can be completed either full or part-time, and is designed to serve recent graduates and practicing engineers who need in-depth knowledge in the rapidly changing and expanding areas of electrical engineering beyond what can be included in the traditional bachelor’s program.

THE PROGRAM

Students may individualize their program of study by selecting classes that fulfill their academic interests and professional needs. Focused coursework is offered in Microelectronics, Systems, Energy, or Computer Engineering. The program may be completed in as little as eight months.*

Accelerated Format*

Students complete 30 credits of coursework and present at least three graduate engineering projects.

Research Focus

Students enroll in twenty-four credits of coursework and develop and defend a six credit thesis project.

Electrical and Computer Engineering

BS/MS in Electrical Engineering (http://catalog.newpaltz.edu/graduate/science-engineering/electrical-computer-engineering/five-year-bs-electrical-engineering-ms-electrical-engineering)
This program offers a fast-track Master of Science degree in electrical engineering. The program is open to SUNY New Paltz students who are currently enrolled in their last semester of the junior standing, pursuing a Bachelor of Science in electrical engineering

BS in Computer Engineering + MS in Electrical Engineering (http://catalog.newpaltz.edu/graduate/science-engineering/electrical-computer-engineering/five-year-bs-computer-engineering-ms-electrical-engineering)
This program offers a fast-track Master of Science degree in electrical engineering. The program is open to SUNY New Paltz students who are currently enrolled in their last semester of the junior standing, pursuing a Bachelor of Science in computer engineering

MS in Electrical Engineering (http://catalog.newpaltz.edu/graduate/science-engineering/electrical-computer-engineering/ms-electrical-engineering)
The Master of Science in Electrical Engineering provides a quality graduate program offered within a small setting, where students get individual attention. The program can be completed either full or part-time, and is designed to serve recent graduates and practicing engineers who need in-depth knowledge in the rapidly changing and expanding areas of electrical engineering beyond what can be included in the traditional bachelor’s program.

EGC593. Comp Eng Select Topics. 3-12 Credits.
Selected topics courses are regularly scheduled courses that focus on a particular topic of interest. Descriptions are printed in the Schedule of Classes each semester. Selected topics courses may be used as elective credit and may be repeated for credit, provided that the topic of the course changes.
Restrictions:
• Must have the following level: Graduate

EGC595. Indep Study Comptr Engin. 0 Credits.
Restrictions:
• Must have the following level: Graduate

EGC795. Indep Study Comptr Engin. 0 Credits.
Restrictions:
• Must have the following level: Graduate

EGE505. Analytical Techniques I . 3 Credits.
Restrictions:
• Must have the following level: Graduate

EGE506. Analytical Techniques II . 3 Credits.
Restrictions:
• Must have the following level: Graduate
EGE511. Digital Data and Computer Communication. 3 Credits.
Restrictions:
• Must have the following level: Graduate

EGE512. Communication Systems. 3 Credits.
Signal analysis, signal transmission. Digital communication systems. Amplitude modulation; angle modulation.
Restrictions:
• Must have the following level: Graduate
• Must have the following field(s) of study (major, minor or concentration): Electrical Engineering (265)

EGE513. Digital Signal Processing. 3 Credits.
Prerequisites:
• EGE 311 with a minimum grade of C-
Restrictions:
• Must have the following level: Graduate

EGE514. Advanced Communications. 3 Credits.
Prerequisites:
• EGE 312 with a minimum grade of C- or EGE 412 with a minimum grade of C-
Restrictions:
• Must have the following level: Graduate

EGE521. CMOS Analog Circuit Design. 3 Credits.
Analysis and optimized design of analog integrated circuits and systems in CMOS technology. Specific topics include MOS devices, device physics, basic CMOS analog circuit building blocks, single stage amplifiers, differential amplifiers, operational amplifiers, reference sources, distortions and controls, various circuit design techniques, options and trade-offs. Graduate Standing or Permission of the Instructor.
Restrictions:
• Must have the following level: Graduate

EGE522. Advanced Analog Circuits. 3 Credits.
Prerequisites:
• EGE 321 with a minimum grade of C-
Restrictions:
• Must have the following level: Graduate

EGE523. Wireless Communications. 3 Credits.
Overview of wireless systems, propagation characteristics of wireless channels, moderns for wireless communications, cells and cellular traffic, fading and multiple access techniques.
Restrictions:
• Must have the following level: Graduate

EGE525. Microelectronic Fabrication. 3 Credits.
The physics and technology of various steps required to fabricate complicated integrated circuits are explained. The Si and GaAs materials will be covered. The course will cover microelectromechanical systems (MEMS) fabrication as well.
Restrictions:
• Must have the following level: Graduate

EGE527. Electronic Properties of Materials. 3 Credits.
Introduction to electronic properties of materials through the concepts of classical mechanics and quantum mechanics principles. Topics include fundamentals of quantum mechanics, Schrödinger wave equations, energy bands, free-electron energy, applications of electronic theory upon electrical, thermal, optical and magnetic properties of materials. Graduate Standing or Permission of the Instructor.

EGE532. Computer Arithmetic. 3 Credits.
Deals with algorithms and architectures used for computer arithmetic. Issues that will be addressed include: number systems and representation, redundant and residue systems. Addition/subtraction circuits. Multiplication, division, square route algorithms, cordic arithmetic system. Floating-point arithmetic systems. Implementation issues – pipelining, low-power, fault-tolerant designs.
Restrictions:
• Must have the following level: Graduate

EGE533. Introduction to Parallel Computing. 3 Credits.
Paradigms of parallel computer systems, memory system implementation, idealized versus practical parallel computer models, parallel algorithms, algorithmic complexity, survey of commercial parallel machines.
Restrictions:
• Must have the following level: Graduate

EGE534. Fault-Tolerant Design of Digital Systems. 3 Credits.
Restrictions:
• Must have the following level: Graduate
EGE535. Low Power VLSI Design . 3 Credits.
Deals with the design of digital systems for low power dissipation. Issues that will be addressed include CMOS power dissipation, analysis and design tools used for low power digital circuits, design methodologies for low power CMOS circuits, low power memory system designs and a discussion on future challenges in low power digital design. Builds on the VLSI design course previously covered by students in Electrical Engineering/Computer Engineering/Computer Science areas. Students are expected to have a background in circuit theory, electronics, digital logic fundamentals, and probability theory fundamentals. These courses are all covered under core courses in the undergraduate program.
Restrictions:
  • Must have the following level: Graduate

EGE536. Computer Architecture. 3 Credits.
Computer architecture and hardware system organization are examined. Topics include performance issues, CPU organization and instruction set implementation, performance enhancement through pipelining, memory organizations, input/output structure, and an introduction to parallel architectures.
Prerequisites:
  • EGC 330

EGE537. VLSI Design. 3 Credits.
Introduction to MOS devices and circuits (N-MOS and CMOS), MOS transistor theory, integrated circuit processing technology and design rules (N-MOS and CMOS), circuit characterization and performance estimation, logic design, interfacing, design tools, testability analysis, and discussion of chip design projects.
Prerequisites:
  • (EGE 230 with a minimum grade of C- or EGE 220 with a minimum grade of C- and EGE 320 with a minimum grade of C-)

EGE541. Transmission Line Theory. 3 Credits.
Analysis and design of short, medium and long transmission lines. Bundled conductors, skin effect, proximity effect and geometric mean distance. Ferranti effect. Standing waves and traveling waves.
Restrictions:
  • Must have the following level: Graduate
  • Must have the following field(s) of study (major, minor or concentration): Electrical Engineering (265)

EGE542. Numerical Methods in Engineering . 3 Credits.
Review of electromagnetic theory and analytical methods. Time domain and frequency domain finite difference methods. Moment methods application to radiation and scattering problems.
Restrictions:
  • Must have the following level: Graduate

EGE543. Antennas and Wave Propagation . 3 Credits.
Restrictions:
  • Must have the following level: Graduate

EGE544. Microwave Circuits . 3 Credits.
Review of transmission lines, waveguides, impedance matching and scattering parameters. Microwave resonators, power dividers, directional couplers, and hybrids, microwave deflectors, mixers, amplifiers, and oscillators.
Restrictions:
  • Must have the following level: Graduate

EGE545. Satellite Communication . 3 Credits.
Restrictions:
  • Must have the following level: Graduate

EGE548. Software Defined Networks. 3 Credits.
Broadband and Carrier Ethernet Networks and technologies. Role of SDN in defining architecture of the next generation of networks. Determination of conformance criteria for networks standards and protocols to support industry solutions and applications.
Restrictions:
  • Must have the following level: Graduate
  • Must have the following field(s) of study (major, minor or concentration): Electrical Engineering (265)

EGE550. Electromechanical Energy Conversion. 3 Credits.
Fundamentals of energy conversion including electric circuits and magnetic circuits. Ideal transformers will be introduced first, and real transformer construction and equivalent circuit will be presented. The equivalent circuit will be solved to determine the transformer efficiency and voltage regulation. Single phase and three phase induction machine construction, equivalent circuit and its analysis under load will be performed to determine motor load characteristics and efficiency. Single phase and three phase synchronous machine construction, excitation, and load characteristics will be studied in detail, and machine transient characteristics will be covered briefly.
Restrictions:
  • Must have the following level: Graduate

EGE551. Real Time Systems. 3 Credits.
Practical experience of real-time operating systems (RTOS) and real-time debugging as applied to real-time embedded systems. Design and implementation of real-time embedded systems: controller, data storage, data acquisition, and communication using a commercially available RTOS.
Restrictions:
  • Must have the following level: Graduate
  • Must have the following field(s) of study (major, minor or concentration): Electrical Engineering (265)

EGE552. Electric power Systems. 3 Credits.
Energy courses, transmission line parameters, transmission lines modeling, power flow analysis, voltage frequency control, and power system protection.
Restrictions:
  • Must have the following field(s) of study (major, minor or concentration): Electrical Engineering (265)
EGE561. Adaptive Control . 3 Credits.
Prerequisites:
- EGE 317 with a minimum grade of C- or EGE 417 with a minimum grade of C-
Restrictions:
- Must have the following level: Graduate

EGE562. Optimal Control . 3 Credits.
Prerequisites:
- EGE 316 with a minimum grade of C- or EGE 416 with a minimum grade of C-
Restrictions:
- Must have the following level: Graduate

EGE564. Non-Linear Control . 3 Credits.
Prerequisites:
- EGE 316 with a minimum grade of C- or EGE 416 with a minimum grade of C-
Restrictions:
- Must have the following level: Graduate

EGE570. Fiber Optics. 3 Credits.
Restrictions:
- Must have the following level: Graduate

EGE572. Engineering Management. 3 Credits.
Prepares engineering students for a career in management. Through class discussions, group projects, role playing, and guest speakers, students find out what a management role will entail. Students learn how to go from being a practicing engineer to being an engineering manager.

EGE575. Heterostructure Devices. 3 Credits.

EGE580. Power Electronics. 3 Credits.
Restrictions:
- Must have the following level: Graduate

EGE590. Thesis in Electrical Engineering . 3-6 Credits.
Research, writing and defense of a thesis under the guidance of the major professor. Required form available in the Records and Registration Office. Required each semester after thesis research project is begun.
Restrictions:
- Must have the following level: Graduate
