Philosophy is the "love of wisdom." It involves a relentless probing of the most profound and difficult questions concerning human beings and their place in the universe. It is therefore the most comprehensive study. The Department of Philosophy offers a program designed to acquaint students with the major divisions of philosophy and with the principal historical and contemporary figures and schools. The study of philosophy is excellent preparation for a variety of vocations and professions, as well as for graduate study in medicine, law, government, business, and journalism.

The Department of Philosophy offers a major (leading to a Bachelor of Arts degree) and a minor. Students should plan their programs in consultation with the department chair or another member of the Philosophy faculty as soon as they decide to declare one of these programs. Philosophy students are urged to complete a minimum of 15 credits in a foreign language and to gain as broad an education in other subject areas as possible.

Philosophy (BA) Program Learning Outcomes

- Read: students should be able to summarize texts accurately, give plausible interpretations, explain any relevant interpretive approaches and principles, and explain or interpret any arguments, positions, ideas, concepts, or claims in them (General Education: Information Literacy).
- Evaluate: students should be able to evaluate arguments, claims, and questions appropriately.
- Argue: faced with a question, problem, or argument, students should be able to generate a focused thesis, construct different possible responses or arguments, and explain or argue why some may be stronger than others (General Education: Critical Thinking and Reasoning).
- Write: students should be able to write clearly and communicate their meaning effectively.
- Speak: students should be able to present philosophical ideas, arguments, and theories orally in a clear and accurate way, ask relevant questions, and respond appropriately and charitably to what they hear.
- Understand: students should be able to demonstrate understanding of the history, problems and major areas of philosophy (General Education: Critical Thinking and Reasoning).
